PROFILE

Frontend Developer with hands-on experience in HTML, CSS, JavaScript, and Python. Completed 2 internships in Full Stack Development and AI. Built an ML-powered web application using Computer Vision and designed responsive user interfaces. CGPA: 9.02/10. Actively seeking full-stack roles where I can build scalable, user-focused products.

PROJECTS

AI-Powered System for Repairing Broken Physical Objects

Python • Machine Learning • Computer Vision • HTML • CSS

- Built an ML-powered web app using Python + Computer Vision to detect object damage patterns and suggest repair solutions.
- Applied image processing techniques to analyze and classify object damage with improved accuracy.
- Designed frontend interface for user interaction and result display.

To-Do List Web Application

HTML • CSS • JavaScript

- Developed an interactive task management app with add, delete, and update features.
- (Rebuilding in React.js to demonstrate component-based architecture)

Personal Portfolio Website

HTML • CSS • JavaScript

- Developed a fully responsive personal portfolio to showcase projects and skills.
